

Q1. Your Name

Dan Rosenberg

Q2. Date:

11/30/2018

Q3. Clinical Performance in Adult Block - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Satisfactory - I was lucky to rotate so much in these clinics as an IM resident here, and the transition to fellowship has not been too bad. I feel like I'm doing a better job in keeping up with literature and guidelines than I did during residency

Q4. Clinical Performance in ENT or Dermatology Clinic if Applicable - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Not applicable

Q5. Clinical Performance in Peds Block - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Satisfactory - I also feel it was helpful to rotate through pediatric clinics during residency, and in fellowship I feel like I've already learned twice as much. I could probably use some improvement in physical exam skills in infants/toddlers, as this is never something I really learned in medical school

Q6. Please rate your research progress - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Satisfactory - I have an idea of what data I'd like to collect for my project (relating to our patients here with COVID), and am on track to start with data collection and IRB approval this winter, with a goal of having a solid plan for research conference this spring.

Q7. QI Project Progress? - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Needs improvement - I would like to tie this to my research project (i.e. compliance with guidelines), but haven't thought about this too much yet

Q8. Classes/Conference attendance - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs improvement and provide an explanation supporting your selection.

Satisfactory - I've only missed one day of conference (while on vacation today)

Q9. Presentation Skills - Satisfactory or Needs Improvement. In the text space, please indicate either satisfactory or needs

improvement and provide an explanation supporting your selection.

Satisfactory - I felt pretty comfortable giving my grand rounds and Wisconsin Allergy society talks

Q10. Please identify your areas of weakness

I do feel that even when I read and prepare on my own time, I could be doing so much more I don't think I'm the best and physical exam and procedures (for the latter, especially intradermal skin testing)

Q11. Please identify how you plan to improve your areas of weakness

Creating a more scheduled plan for reading - i.e. read about one general topic each week and plan in advance Try to see more patients in clinic that require special testing

Q12. Please identify your strengths

Interpreting and applying literature to clinical practice Confidence in being able to give an assessment and plan before attending critique Clinical experience already gained during residency and further improved during fellowship

Q13. Please list your career goals and the support you need

I would ultimately be interested in an academic position, with my interests being clinical research and teaching. I'll be able to learn more about research through my developing project. I'd like to be more involved in teaching (residents, students, etc.)
