

Start Date	Who are you evaluating?	Please Choose One Topic	What type of procedure	Which best describes the fellow's aptitude for performing the procedure selected?	How would you describe the fellow's ability to identify and treat patients with acute respiratory failure (ARF)	Which of the following category best identifies the fellow's ability to manage unstable patients?	Comments	Your Name:
2/14/2019 7:54	Yaoli Yang	Invasive Procedures	Thoracostomy tube placement	Upper quartile			Very slick procedurally, and very nice job walking the intern through the steps.	Glazer
2/16/2019 11:39	Yaoli Yang	Management of Acute Respiratory Failure			Consistently identifies and appropriately treats patients with ARF		Effectively and autonomously implements open-lung ventilation, lung protective settings, and vent liberation. Wow, Yaoli is just so clinically appropriate -so far today, her plan to manage a likely unnecessary tunneled HD catheter, her mgmt and intubation of a CWC patients, and her assessment and plan of a rubbing alcohol ingestion were all high level - nice job Yaoli, you can be me doctor when I get sick!	Glazer
2/25/2019 16:43	Yaoli Yang	Management of Unstable Patients				Demonstrates ability to create and verbalize future treatment plan for variety of responses from initial treatment plan		Kory
