Q1. Fellow's Name?

Yaoli Yang

Q2. Date?

11/14/2018

Q3. Are you competent with chest tubes procedures? If not, how many do you plan to do to become competent?

No I have not performed any chest tubes yet (outside of cadaver). I plan on doing 5 before becoming competent (where I would feel comfortable doing it alone in an emergency) but ideally I prefer to do 10 to be comfortable.

Q4. Are you competent in airway management? If not, how many procedures do you plan to do to become competent?

I feel competent in airway management in an emergency with anesthesia available for backup. I am not sure how many I need to do before becoming competent as difficult airways or significant hypoxic conditions have been pretty rare to come by on call. Most intubations I have done in the TLC have been for GI procedures where the patients were fairly stable, or for altered mental status.

Q5. If you are a first year have you lead 5 family meetings? If you are a 2nd or 3rd year, have you lead at least 50% of the family meetings you have participated in?

1st year - Yes more than 5

C 1st year- No less than 5

C 2nd and 3rd year - Yes at least 50%

C 2nd and 3rd year - No less than 50%

Q6. Fellows teaching: By the end of your fellowship, will you have at least 3-4 talks that you have given during morning lectures?

• Yes

🖸 No

Q7. Fellows teaching: If you are a 2nd or 3rd year fellow, have you given 1 or 2 talks during morning lectures?

⑦ Yes
⑦ No

Q8. If no, why not?

Q9. Please rate your overall clinical performance

C Far exceeds expectations

~

€ Exceeds expectations

- Equals expectations
- C Short of expectations
- C Far short of expectations

Q10. Please explain your response to the previous question

I think I am appropriate for my level of training but of course have much to work on before being an independent attending, in particular with knowledge of pulmonary medicine

- Q11. Please rate you performance of general bronchoscopy
 - C Extremely good
 - C Moderately good
 - C Slightly good
 - Neither good nor bad
 - C Slightly bad
 - C Moderately bad
 - C Extremely bad

Q12. Please explain:

I think I am appropriate in skills in terms of how many bronchoscopies I have done (~25-30 or so).

Q13. Please rate your performance of complex airway procedures

- C Extremely good
- C Moderately good
- C Slightly good
- C Neither good nor bad
- C Slightly bad
- C Moderately bad
- Extremely bad

Q14. Please explain

I have not had much opportunity to do complex airway procedures so probably NA is a better response.

Q15. Please rate your performance of pleural procedures

- C Extremely good
- C Moderately good
- C Slightly good
- Neither good nor bad
- C Slightly bad
- C Moderately bad
- C Extremely bad

I am looking to do more pleural procedures - the ones so far have been very large effusions and relatively easy to perform.

Q17. Please rate your performance of advanced diagnostic bronchoscopy

- C Extremely good
- C Moderately good
- C Slightly good
- C Neither good nor bad
- C Slightly bad
- C Moderately bad
- Extremely bad

Q18. Please explain

I have not had much opportunity to do advanced diagnostic bronchoscopy (EBUS).

Q24. Do you feel that your are provided adequate resources for wellness?

- C Definitely yes
- Probably yes
- C Might or might not
- C Probably not
- C Definitely not

Q25. Do you feel the program takes your overall wellness into consideration?

- C Definitely yes
- Probably yes
- C Might or might not
- C Probably not
- C Definitely not

Q19. Please rate your professionalism

- C Extremely professional
- Moderately professional
- C Slightly professional
- C Neither professional nor unprofessional
- C Slightly unprofessional
- C Moderately unprofessional
- C Extremely unprofessional

Q20. Please explain

Overall I think I am very professional with my the TLC team. I worry sometimes between the hours of 3-6 AM on stressful calls I sound more strained on the phone. Some observers have told me this is my own perception and I don't come across this way but I would like to work on this. 1) More comfortable with chest tubes, thoracentesis and LPs 2) More pulmonary knowledge for common pulmonary consult questions 3) Work on not just having a good professional relationship with residents and staff but also know them as individuals

Q22. Please identify how you plan to improve your areas of weakness

1) Seek to perform procedures personally whenever possible and also look at pulmonary outpatient scheduling board for any other opportunities. I already feel independent with various art and central venous lines and also paracentesis, through doing any many of them as possible 2) Try to read 2 topics each week on consults related to the consult question to help build a library of resources 3) Even on busy TLC days, try to engage more with residents and other members of the multi-disciplinary team to build rapport

Q23. Please identify your strengths

1) I am thorough and will make sure to look over things when residents are admitting patients. I think overall residents feel a good sense of independence but know that I am also watching over things and supporting them so things are not missed. 2) I think I am fairly good at delegating tasks on consults and giving residents and medical students some help on how to approach a case before they see the patient. 3) I try to make sure family members are communicated about updates for their loved ones and I make that a priority of mine.
